Finance for the Future

Investments, Sustainable Finance and FinTech

5 – 24 July 2020

Faculty of Business, Economics and Informatics
in collaboration with the International Relations Office

Course Description

In this Summer School, the fundamentals of investments and the latest developments in finance – Sustainable Finance and FinTech – will be presented. At the beginning of the Summer School, you will learn the theoretical basics of portfolio management. You will apply this knowledge within a practice-oriented portfolio management simulation in which you will manage two investment funds in a group.

Sustainable Finance is a further main topic you will encounter within the three weeks. Sustainable Finance has emerged as a key opportunity to deploy large amounts of capital for financial returns and positive social and environmental outcomes. Develop an understanding of the sustainable development in the financial sector as well as its value generation in economic, environmental and social terms. Get to know FinTech, a combination of finance and innovation that aims to compete with traditional financial methods in the delivery of financial services.

Participating in this Summer School will not only allow you to get to know the University of Zurich but also to experience Zurich as one of the world's most attractive student cities.

Hosting Institute

Department of Banking and Finance, UZH
